

**Ward (Sam) Rouse**

**Attorney**

I retained Sean to help defend a client charged with a serious criminal offense. Sean recovered digital information from a cell phone that a prior expert had told me was unrecoverable. He then located another IT specialist on the other side of the country with a unique program to recover further information. The recovered digital information was crucial to this client's defense, and probably the most important factor in the terrific outcome of the case. Sean was professional, dependable, knowledgeable, and seemed to take a real interest in helping. He was surprisingly affordable given the difficult task and great results.less

November 20, 2013, Ward (Sam) was Sean's client

**Allen Oh**

**Registered Patent Attorney at Condo Roccia LLP**

I have known Sean for a number of years through our mutual involvement in the Computer & Technology Law Section of the Minnesota State Bar Association. This year, when I served as Chair of the Section, Sean made many contributions to the work of the Section, including chairing a number of committees and authoring many articles for the blog. The success of the Section this year is largely due to Sean's dedication and hard work.less

**Todd Zerlin**

**Attorney/Principal, Courtroom Visual LLC**

Sean is dedicated and thorough. With a wide variety of experience and knowledge and high ethical standards, he is a tremendous asset and is sure to provide critical insight on forensic matters.

May 10, 2012, Todd was with another company when working with Sean at Attorney Client Privilege, LLC

**Faison Sessoms**

**Criminal Defense Attorney**

My name is F. T. Sessoms and I am a criminal defense attorney. I hired Mr. Harrington to conduct a forensic examination of some computer hard drives seized from my client by the police. Mr. Harrington conducted a prompt and thorough examination of the evidence and using his testimony at trial we were able to convince the prosecutors and the judge that, "things aren't always what they seem".

Mr. Harrington does excellent work. He knows what he is doing. He is able to communicate complex "computerese" in a clear and concise fashion. I highly recommend him as a computer forensic expert.less
